

Free dental program for kids under age three

Fraser Health's Public Health team offers a free dental program for children under 36 months of age, who are not under the regular care of a dentist.

Our dental staff will:

- Provide a risk assessment for tooth decay to determine if your child requires fluoride varnish.
- Provide appropriate dental health information to promote healthy dental behaviours.
- Help families access dental care and available resources.

Call to book an appointment:

Mission, Abbotsford, Chilliwack, Agassiz, Hope: Call 604-702-4906
All other Fraser Health areas: Call 604-476-7087
